

RELEASE LINER TAKEUP INSTALLATION PROCEDURES

- 1) Remove both upper supply roll brackets and save mounting fasteners (step 1).
- 2) Install rectangular mounting brackets (A) from 'parts package' to threads where supply roll brackets were mounted, using fasteners from supply roll brackets.
- 3) Place release liner takeup on top of HD machine and align threads on bottom of release liner takeup (B) with brackets mounted on HD (step 2). Secure with fasteners included in parts package.
- 4) Install supply roll brackets removed in (step 1) onto release liner side panels at location (C).
